Clean Tools

Practical and clean

Ref.: H500000

CLEAN TOOLS - WITH NO PARTICLE DEPOSITS

To ensure high-precision work, you need to have clean tools.

This cleaning holder enables you to clean most tools, by planting them gently in the foam.

Oil-pikes, cleaning pegs: the foam absorbs oils or glues

Screwdrivers, tweezers: the foam retains any particles or filings

For particularly fragile tools that could bend when they enter the foam, there is the option of sliding them along the foam grooves, and slightly upwards.

This high-density foam remains highly homogeneous, without releasing any dust or particles. It is a possible alternative to elder.

With its weighted non-slip base, Clean Tools can also be used as a tool holder

Technical specifications:

- Hyper-absorbent high-density foam
- Holder made from synthetic material

Contents:

H500000: Holder plus cleaning foam

Dimensions:

Ø70 x 55 mm

Weight:

345 g

Clean Tools

Product details

APPLICATIONS:

- **CLEANING TOOLS**

Advantages:

- Interchangeable foam
- Weighted non-slip base

Clean Tools

Replacing the foam

If the foam starts to become saturated with particles, glue or oil, it can be turned over or replaced with a new one.

Method:

- Unscrew the 2 screws accessible from the underside of the holder using a small-diameter Philips head screw
- Replace the foam
- Hold the foam in position, and screw in the 2 screws from below
