Handling tray

Racking – Non-scratching – Quick

Ref.: H497000

A TRANSFER TRAY PROVIDING A BETTER FINGER GRIP ON THE COMPONENTS

This transfer tray makes it easy to grip very fine components, without the need for specific tools. Thanks to the tray's soft material, components can be handled with your fingers.

With its two standard sizes, this tray is suitable for most cell trays on the market. Custom dimensions are also available.

Simply place this tray upside-down over the cells and turn over the assembly to transfer all the components onto the tray.

In electroplating workshops, racking is an arduous, repetitive operation. Using this tray makes working with small components much easier.

Technical specifications:

- Beige colour
- Lightweight
- Soft feel
- Anti-slip fabric
- Soft foam
- For honeycomb tray

Handling tray

Product details

APPLICATIONS:

- **HANDLING PARTS WITH YOUR FINGERS**

Maintenance advice:

Clean using an alcohol wipe

Advantages:

- Non-scratching
- Lightweight
- Soft feel
- Manual grip
- Easy to use

Handling tray

Recommendations

- Choose from the two tray sizes, according to your application
- The transfer tray must be slightly bigger than the cell tray, for ease of use
- Place the working surface of the transfer tray on the cell tray
- Turn over the assembly so that the components are left on the transfer tray
- The components can be easily handled with your fingers
