VERSATILE CASE OPENER FOR BEZELS AND PRESS-ON CASE-BACKS

Efficient, safe, quick and no need for adjustment

THIS CASE OPENER WAS DESIGNED TO MAKE OPENING CASE-BACKS QUICK AND EASY FOR BATTERY CHANGES, AND TO EXTRACT BEZELS WITHOUT THE NEED FOR ANY ADJUSTMENT.

Equipped with two steel blades to cover all watch diameters, the case opener is one of the most versatile tools on the market. The blade can be changed in a few seconds. The height can be adjusted by compressing the foam on which the watch is positioned.

The blade is pressed onto the watch via a pitch screw.

Unlike the case opener blade, there is no danger of injury using this device.

Thanks to its four feet, there is no need to remove the bracelet to open the watch.

Technical specifications:

- A blade holder and two mounted blades
 - Blade for small diameter
 - Blade for large diameter
- Specific blades (Customizable on request)

Size:

65 x 80 x 175 mm

Weight:

340 grams

VERSATILE CASE OPENER FOR BEZELS AND PRESS-ON CASE-BACKS

Product details

RECOMMENDATIONS:

Select the right blade for your diameter.

Position the watch on the foam, orienting the crown into the notch provided.

Whatever the direction of the watch, hold it with one hand.

Present the blade while screwing in the handle with your other hand, so as to gradually introduce the blade at the desired point.

Press on the watch simultaneously to adjust the height, and screw in the handle to engage the blade.

For a better view, you can move the tool closer to your eyes.

You may need to apply a rotation movement to the watch to facilitate opening. In this case, place the tool on the table to ensure stability.

REPLACING THE BLADES

To replace the blades, use a 2.5 mm Allen key
